deb packaging

As per DEP-17 when packaging for modern debian files from /bin /lib /sbin should be placed in their /usr counterpart.

```
sudo apt update
sudo apt install build-essential devscripts debhelper dh-make lintian fakeroot
```

```
mkdir testapp-1.0
cd testapp-1.0
dh_make --createorig -s -y
```

```
lintian -c dist/kyosk-systemd_0.1.0_all.deb
```

meilisearch

```
curl -L https://install.meilisearch.com | sh  
sudo mv meilisearch /usr/local/bin
```

```
meilisearch --master-key="aSampleMasterKey"
```
