

Security Hardening Setup

Configuration

```
// in app/Service/SecurityService.php

use Illuminate\Support\Facades\DB;
use Illuminate\Support\ServiceProvider;

class SecurityService extends ServiceProvider
{
    /**
     * Bootstrap any application services.
     */
    public function boot(): void
    {
        DB::prohibitDestructiveCommands($this->app->isProduction());
    }
}
```
